WALLISON COSTA

Full-Stack / Front-End Developer

SUMMARY

Full-Stack Developer, graduate of EBAC, currently working at Holy Learning on a real-world academic and financial management product, in addition to freelance projects. Experience with React, TypeScript, Next.js, Django and Supabase/PostgreSQL, including payment and contract integrations, financial business rules and automations. Challenge-driven, with a focus on clean code, testing and continuous delivery.

SKILLS

Front-end: React, TypeScript, Next.js, Vite, React Query, Tailwind CSS, styled-components, HTML, CSS, JavaScript, Sass, Less, Bootstrap

Back-end and data: Django, Django REST Framework, Node.js, Supabase (Auth, Edge Functions), PostgreSQL, MySQL, REST API, WebSockets (Channels)

Integrations: Asaas (charges, subscriptions and webhooks), Clicksign (contracts), Web Push, transactional email

Quality and tooling: Jest, Cypress, Pytest, Docker, Git/GitHub, Gulp

Also: C++, C#, Vue.js

PROFESSIONAL EXPERIENCE

Holy Learning · Developer 03/2026 – Present

Holy Learning Hub – academic and financial management platform

- Full-stack development of the platform using React, TypeScript, Vite, React Query and Tailwind/shadcn on the front end, and Supabase (PostgreSQL, Auth and Edge Functions) on the back end.
- Asaas integration: charges, subscriptions, checkout, debt negotiation, delinquency handling and webhooks, with an automated collection routine (cron).
- Contract workflow with Clicksign (sending, signing and email confirmation) and student creation triggered by payment events.
- Assessment module (written, oral, report card and make-up exams) and lesson attendance tracking, integrated with Google Meet.
- Push and email notifications through cron jobs, and data modeling with over 170 versioned migrations.

Freelance · Python Full-Stack Developer 02/2023 – Present

- Built and maintained responsive web pages for clients, using React and TypeScript on the front end and Django or Node.js on the back end.
- REST APIs, MySQL integration, styling with Bootstrap, Sass and Less, and task automation with Gulp.
- Front-end testing with Jest and Cypress and back-end testing with Pytest; standardized environments with Docker and version control with Git.

RELEVANT PROJECTS

Financial Flow – Personal finance engine Personal project

Django, Django REST Framework, React, TypeScript

- Financial planning API that connects monthly budgets, long-term goals, recurring transactions and multi-currency control in a consistent transactional flow.
- Recurring transaction engine (daily, weekly, monthly and yearly) with next-run tracking and atomicity.
- Goals modeled as reserved capital, credit card invoices kept separate from the bank balance, and currency conversion with the rate frozen at transaction time.
- Dashboard with net worth, safety margin and budget overrun alerts.

Twitter Clone – Social network 05/2024 · Personal project

React, Redux Toolkit, Django, REST API

- Creating, editing and interacting with posts, comments, likes and retweets; token-based authentication, user profiles and a paginated timeline of followed users.

ChatApp – Real-time chat 04/2024 · Personal project

Django, Django REST Framework, Channels, WebSocket, Bootstrap

- Sign-up, login, contact list and conversation history, with real-time communication over WebSocket in an ASGI environment.

EPLAY – Digital game store 03/2024 · EBAC course

React, TypeScript, Redux Toolkit, React Router, Formik, Yup

- External API consumption with createApi, product and category pages, and a checkout with validated forms.

EDUCATION

B.Sc. in Software Engineering – Estácio (in progress) 01/2026 – Expected 12/2029

Python Full-Stack Developer – EBAC 12/2022 – 06/2024
